

WEICON GmbH & Co. KG

For release, protection and lubrication

Weicon Anti-Seize Ceramic Paste ASK

The manufacturer of special chemical products Weicon has developed a metal-free high-performance assembly paste that is compatible with stainless steel and other nickel alloys (no chrome-6 formation) - Weicon Anti-Seize Ceramic Paste or ASK for short.

Anti-Seize Ceramic Paste

ASK is a metal- and silicone-free synthetic high-performance assembly paste for universal use. It is resistant to high temperatures, has an exceptionally good release effect and is suitable for any material.

The paste contains no free metals and is compatible with stainless steel and other nickel alloys (no chromium-6 formation). The assembly paste is especially suitable when metal-containing pastes can cause electrolytic reactions, when nickel-containing products should or may not be used for health reasons and when dark metal-containing products should or may not be used for visual reasons.

Anti-Seize Ceramic Paste offers excellent release, protection and lubrication even at high temperatures and high pressure.

The paste offers very good protection against corrosion, wear and extreme weather conditions. The assembly paste can be used on bolts, screws, stud bolts, pipe connections, nuts, mechanical seals, etc.

Suitable for different areas of application

Typical areas of application for the paste are chemical plants, oil refineries, power stations, paper mills, steelworks and foundries as well as the shipping industry.
