Indoor and outdoor bonding

Weicon Assembly Adhesive

For applications in the construction sector, adhesives and sealants manufacturer Weicon has developed a new adhesive – the Assembly Adhesive.

Universally applicable, fast-curing

This is a fast-curing, high-adhesion, rubber-based contact adhesive. The adhesive is temperature-resistant in a range from -40 °C to +100 °C and is suitable for both indoor and outdoor applications. It is stable, does not drip and is also suitable for bonding to vertical surfaces. The adhesive is weather, age and UV resistant and free of silicone.

The elastic 1-component assembly adhesive can be used universally and adheres to a wide variety of materials, such as wood and wood fiber boards, MDF and OSB boards, decorative panels, steel, aluminum, plastic, PVC, plaster, plasterboard, ceramics, masonry, tiles, stone as well as concrete.

Adhesive for assembly work

Assembly Adhesive can be used for a wide range of applications. For example, it is used for quick and permanent fixing of skirting boards, panels, flooring elements, wall coverings, window bottoms, door thresholds, wooden door frames, decorative profiles and many others.

Before applying the adhesive, the surfaces to be bonded must be cleaned and free from dirt, oil, grease and dust. The Assembly Adhesive

has a curing speed of two to three millimeters in the first 24 hours. The light beige adhesive can be stored in an unopened state for up to twelve months.
