

**WEICON GmbH & Co. KG**

## **A tool for all occasions**

### **Weicon Tools Electrician Scissors XL**

The manufacturer Weicon Tools has developed a universally applicable tool for three of the most common areas of application in electrical installation – the Electrician Scissors XL.

#### **Universally applicable**

The Electrician Scissors XL have been developed for three different areas of application: cutting, stripping and crimping. The scissors have been designed so that they can be used in many situations in everyday working life, making them a useful addition to other electrical tools. They have been specially tailored to the needs of professional users and are used in both trade and industry.

#### **Cutting, stripping and crimping**

The cable shears are used for cutting and stripping Cu/Al cables and crimping wire end ferrules from 0.5-6 mm<sup>2</sup>. The shears are characterised by a very high cutting performance. It cuts fine-stranded copper and aluminium cables up to a cross-section of 50 mm<sup>2</sup>. In addition to cutting, wires and cables can be stripped quickly and easily with the special tool. The cable is held in the trough during the cutting process. The fine micro-serration of the blades enables flush and slip-free cutting, resulting in a precise cut.

## **Ergonomics and safety**

The handle diameter of the scissors is extra-large and ergonomically designed, making it comfortable and fatigue-free to work with, even over long periods of use. The non-slip 2-component handles made of impact-resistant glass fibre reinforced plastic ensure safe working.

The tool comes with a practical safety box with belt clip for safe storage. The scissors are 160 mm long, weigh 140 grams and are supplied in recyclable cardboard packaging.
